

YES! WE DO GREEN AND THINK SUSTAINABLE.

**RAINWATER AND DIRTY SEWAGE HAVE A
SEPARATE SEWER.**

**ALL RAINWATER IN VREDEOORD WILL BE
COLLECTED FROM THE ROOFS, BACK PATHS
AND STREETS.**

**RAINWATER IS TRANSPORTED TO
THE WADI.**

**WATER IS STORED IN THE WADI
OR SURRENDERED TO NATURE. SO,
WE MAKE SURE IT DOESN'T GET TOO DRY
IN OUR SURROUNDINGS.**

**IT IS IMPORTANT THAT THIS WATER IS CLEAN,
WE DON'T LIKE TO DAMAGE NATURE. THAT'S
WHY WE THROW NO POLLUTED WATER OR
WASTE IN THE RAINWATER SEWER.**

**THERE IS AN INFILTRATION CRATE IN
THE GARDEN OF ALL RENTAL PROPERTIES,
THIS WAY WE RETAIN WATER.***

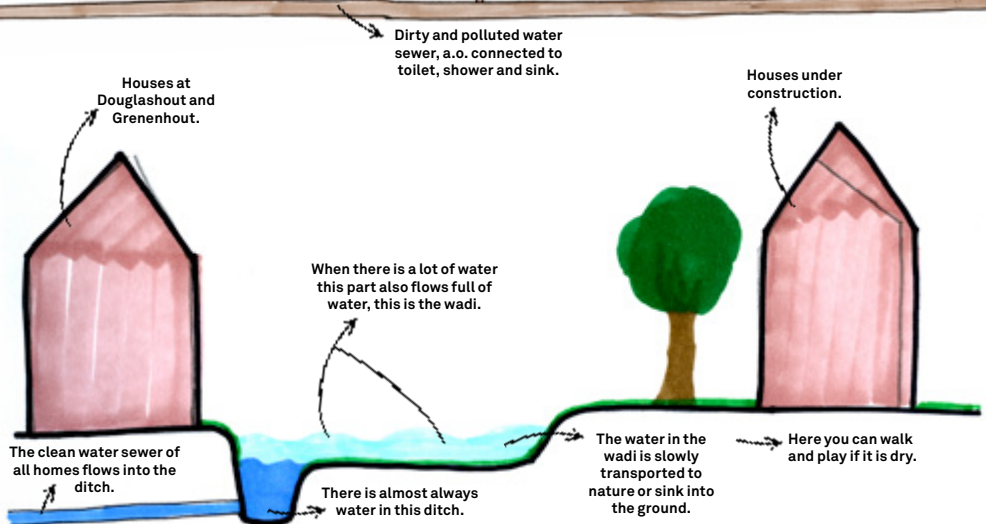

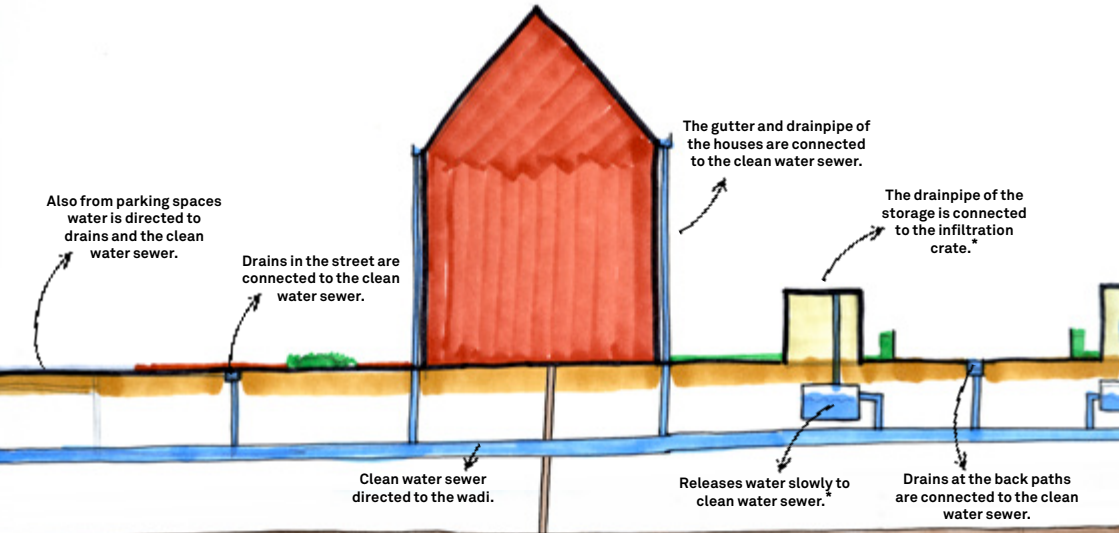

**THIS CONTRIBUTES TO A SUSTAINABLE
AND GREEN NEIGHBORHOOD.**

**THE WADI IS CENTRALLY LOCATED IN
VREDEOORD. SOMETIMES THE WADI IS
FULL OF WATER, SOMETIMES IT IS DRY AND
EVERYONE CAN PLAY OR WALK HERE.**

* There is no infiltration crate in the gardens of owner-occupied homes. The rainwater drainage of the storage is not connected to the clean water sewer. The rainwater infiltrates in the soil.

YES! VREDEOORD IS BIGGER THAN MY OWN HOUSE AND GARDEN.

**THE GREEN WALK
IN THE MIDDLE OF
VREDEOORD**

* There is no infiltration crate in the gardens of owner-occupied homes. The rainwater drainage of the storage is not connected to the clean water sewer. The rainwater infiltrates in the soil.
